

## CASE STUDY – TP SOW Portal App

### Project Overview:

An internal portal for SOW creation, approval workflows, and analytics.

### Your Role:

Backend & UI developer focusing on workflow automation and SOAP integrations.

### Key Contributions:

- Automated approval process
- Integrated WSDL/SOAP services
- Built reporting dashboard
- Implemented audit logging

Tech Stack: .Net Core MVC, C#, SQL Server, SOAP/WSDL

### Results:

- Approval time reduced 3 days → 6 hours
- 80% improvement in data accuracy
